

MUHAMMAD QAIS

DATA ANALYST

Rawalpindi, Pakistan | +92 320 6866865 | muhammadqais865@gmail.com | linkedin.com/in/muhammad-qais-38410b326 | github.com/qais242004

PROFESSIONAL SUMMARY

Results-driven Data Analyst combining hands-on SQL, Python, and Power BI experience from data analytics internships at Systems Limited and Andersen with independent, end-to-end data projects spanning ETL/ELT development, data warehousing, and dimensional modelling. Proven ability to transform raw, messy data into clean, well-modeled datasets and compelling visual reporting that drives business decisions. Fast learner with a strong analytical foundation, ready to deliver immediate value in a full-time Data Analyst role.

CORE TECHNICAL SKILLS

Languages & Query Tools: SQL, Python (Pandas, NumPy), DAX, M Language (Power Query)

BI & Reporting: Power BI, Dashboarding, KPI Reporting, Data Visualization, Microsoft Excel

Data Analysis: Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), Statistical Analysis

Data Warehousing & Modelling: ETL/ELT, Dimensional Modelling, Star & Snowflake Schema, Medallion Architecture

Cloud & Data Engineering: Microsoft Fabric (Lakehouse, Data Factory, OneLake), Microsoft Azure

Databases: MySQL, SQL Server, RDBMS, Joins, Views, Stored Procedures, Window Functions

Tools: Power BI, Microsoft Fabric, Excel, VS Code, Git, GitHub

PROFESSIONAL EXPERIENCE

Data Analyst Intern — Andersen

Sep 2026 – Present

- Supporting the team as a Data Analyst Intern, working with business data to produce analysis and reporting.
- Using SQL, Python, and Power BI to clean, analyze, and visualize data for stakeholder insights.

Data Analytics Intern — Systems Limited, Rawalpindi, Pakistan

May 2026 – June 2026

- Engineered ETL workflows in Microsoft Fabric to automate data ingestion and transformation, boosting pipeline reliability and cutting manual processing effort.
- Extracted, cleaned, and analyzed multi-source data using SQL and Python, delivering high-quality, reporting-ready datasets.
- Designed and deployed interactive Power BI dashboards, giving stakeholders real-time visibility into KPIs to support faster decision-making.

PROJECTS

Retail Sales & Customer Analytics Platform

Python, SQL, Power BI, Pandas, Scikit-learn

- Engineered a full-cycle SQL/Python ETL pipeline processing 100,000+ retail transactions into a dimensionally modeled data warehouse.
- Applied RFM customer segmentation to pinpoint the 15% of customers generating over 60% of total revenue, enabling targeted retention strategy.
- Delivered an executive Power BI dashboard with drill-through views, cutting manual reporting time by 5+ hours per week.

Enterprise Data Warehouse & ETL/ELT Pipeline

Python, SQL, Microsoft Fabric, Lakehouse, Dimensional Modelling

- Architected a metadata-driven ETL/ELT pipeline ingesting multi-source structured data into a Microsoft Fabric Lakehouse warehouse.
- Designed a star schema with fact and dimension tables, enabling fast, reliable descriptive analytics and reporting.
- Automated data transformation and validation through Fabric Data Factory, implementing a Bronze/Silver/Gold Medallion architecture end-to-end.

Electricity Theft Detection System

Python, Data Analysis, MySQL, Web Dashboard — Final Year Project

- Designed and delivered an end-to-end pipeline detecting abnormal electricity consumption patterns to flag potential theft, from raw data ingestion through to a live reporting dashboard.

EDUCATION

BS in Computer Science — Arid Agriculture University, Rawalpindi, Pakistan

Oct 2022 – May 2026

Relevant Coursework: Data Structures & Algorithms, Databases, Software Engineering, Operating Systems, Networking
